The Hanging Gardens of Babylon: Wonders of the World Book

The Hanging Gardens of Babylon are one of the most famous and enigmatic wonders of the ancient world. They were said to have been built

by King Nebuchadnezzar II for his wife, Queen Amytis, in the 6th century BC. The gardens were described as a series of terraces, rising up to a height of over 100 feet, and planted with a variety of trees, flowers, and shrubs. They were said to have been watered by a system of pumps and canals, and to have been a place of great beauty and wonder.

The Hanging Gardens of Babylon have been the subject of much speculation and debate over the centuries. Some scholars believe that they were actually built, while others believe that they were only a legend. There is no definitive evidence to support either claim, but the gardens have continued to fascinate people for centuries.

In 2013, a team of archaeologists from the University of Oxford announced that they had found evidence of the Hanging Gardens of Babylon in the ancient city of Babylon. The archaeologists found a series of terraces, ramps, and canals that they believe were part of the gardens. This

discovery has led to renewed interest in the Hanging Gardens of Babylon, and has helped to shed light on this ancient wonder.

The Hanging Gardens of Babylon are one of the most famous and iconic wonders of the ancient world. They are a testament to the ingenuity and creativity of the ancient Babylonians, and they continue to fascinate people today.
