Smith begins his book with a look at the disappearance of Amelia Earhart, the pioneering aviator who vanished over the Pacific Ocean in 1937. He examines the various theories about what happened to Earhart, including the possibility that she was captured by the Japanese or that she crashed her plane on a remote island. Smith also presents new evidence that

suggests that Earhart may have survived her crash and lived out her days in secret.

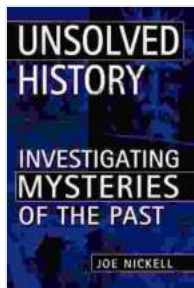

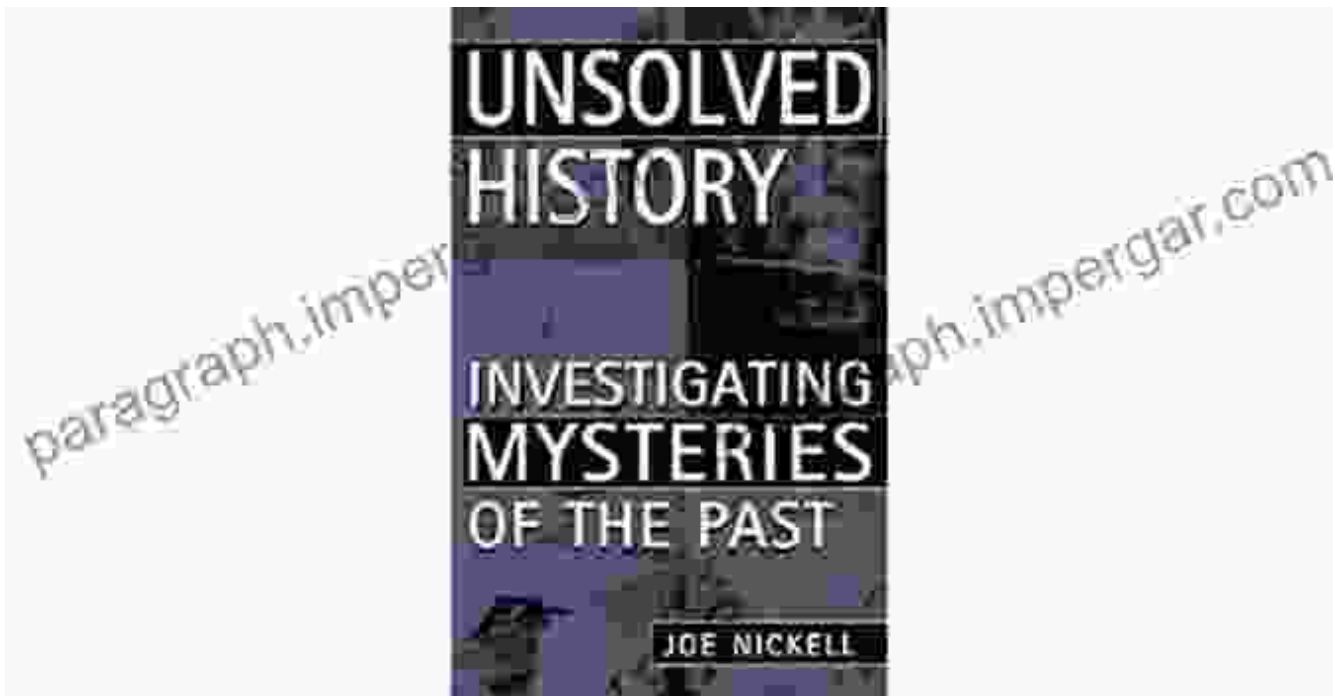

Smith then turns his attention to the assassination of John F. Kennedy, one of the most infamous unsolved crimes in American history. He examines the evidence surrounding the assassination, including the eyewitness accounts, the ballistics reports, and the autopsy findings. Smith also presents new theories about who may have been responsible for Kennedy's death, including the possibility that there was a conspiracy involving the CIA or the Mafia.

In addition to these two famous cases, Smith also investigates a number of other unsolved mysteries, including the Zodiac killer, the Black Dahlia murder, and the disappearance of the Mary Celeste. He presents new evidence and theories in each case, offering readers a fresh perspective on these enduring enigmas.
